Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Counsel explained that the Brucks (2003/0103921) reference teaches a solidified product as opposed to a liquid composition and that the teachings of Brucks and Watanabe (teaches liquid) cannot be combined because of this reason. Discussed the results on pages 25 and 26 of the instant specification and it was emphasized that the claimed "isotropic liquid phase exhibiting bicontinuous structure" is a critical feature for the ability of the composition to clean oil as well as water make up. Discussed the possibility of applying the teachings of Watanabe alone or in combination with another reference. Applicants will submit the response to the outstanding action and the arguments will be considered in determining the patentability .
